

The Commercial Building Automation Market

The Commercial Building Automation Market is the second report from Berg Insight analysing the latest developments on the smart buildings market in Europe and North America.

This report in the IoT Research Series provides you with 200 pages of unique business intelligence including 5-year industry forecasts and expert commentary on which to base your business decisions.

Highlights from this report:

- **Insights** from 30 executive interviews with market leading companies.
- **360-degree** overview of the smart building & building automation ecosystem.
- **Summary** of industry trends in key vertical market segments.
- **Statistical** data on adoption of building automation systems in Europe and North America.
- **New** market forecasts lasting until 2024.
- **Detailed** reviews of the latest initiatives launched by industry players.
- **Updated** profiles of 60 key vendors in this market.

Berg Insight's IoT Research Series

What are the key business opportunities in the emerging wireless M2M/IoT market? Berg Insight's IoT Research Series is a unique series of 45 market reports published on a regular basis. Each title offers detailed analysis of a specific vertical application area such as smart homes, smart metering, fleet management and car telematics, or covers horizontal topics including IoT platforms, software, hardware, IoT connectivity statistics and the mobile operators' IoT strategies.

Where is the smart building market in Europe and North America headed?

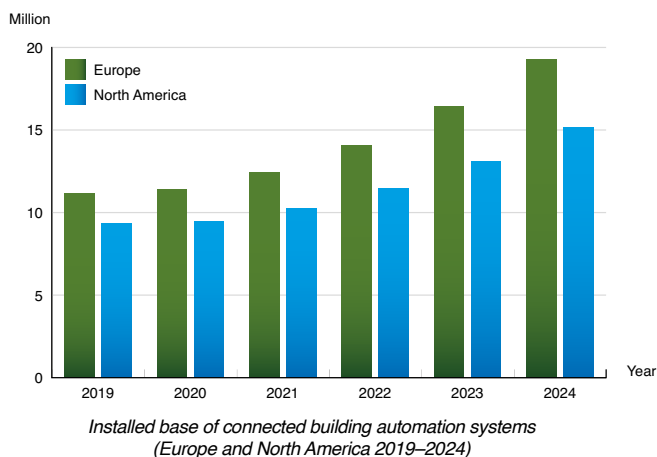

Building automation systems include a wide range of solutions for controlling, monitoring and automating functions in buildings such as commercial office spaces, retail stores, hotels, schools, hospitals and industrial buildings. These systems can be controlled in various ways, ranging from simple local controls and user interfaces to cloud-based Building Management System (BMS) that offer remote and centralized control of several building functions across multiple sites. In this report, building automation systems are grouped into six primary categories: HVAC and energy management; lighting and window control; fire safety, security and access control; elevator and escalator management; audio, video and entertainment; and water management.

Berg insight's definition of a connected building is one that includes one or several building automation systems that can be controlled and monitored from remote through a web portal or Internet-connected management system. A smart building is furthermore one that includes a system that combines and aggregates data from various building functions to provide insights on the overall building performance. In a smart building, the various systems are aware of each other and exchange data to optimize building operations and occupancy comfort. For example, the HVAC system can control the level of ventilation in a room or certain area of the building based on data from occupancy sensors or the access control system which knows who and how many people that enter the building.

Building automation has been around for many decades but there is a new urgency due to factors such as energy conservation as well as mandates for green construction. IoT offers the technologies for building owners to easily measure and conserve energy. A major change is starting to happen now especially in new construction, where the primary driver is changing from cost reduction to features that enhance the user experience and change how users and buildings interact. New use-cases are emerging which leverages the Internet of Things, sensors and connectivity. The technology enables customization of spaces in offices and conference rooms based on occupancy levels and occupant preferences as well as provide location and navigation throughout a building to help occupants find conference rooms and available work desks. ▶

▶ Berg Insight estimates that 3.23 million connected building automation systems were shipped in Europe and North America in 2019. Note that by connected systems we mean systems that are connected to the Internet and send data to a backoffice platform. Systems that can only be viewed and controlled locally on-premise is therefore not included. Shipments include installations in new constructions as well as in incumbent buildings. The total installed base of connected systems in Europe and North America reached an estimated 20.5 million systems in 2019. Berg Insight forecasts that the installed base will grow at a CAGR of 11.0 percent in the two regions to reach 34.4 million connected building automation systems in 2024. Berg Insight furthermore estimates that the building automation market in Europe and North America generated revenues of close to € 29.5 billion in 2019. The market will grow at a CAGR of 10.4 percent to € 48.4 billion in 2024. Developments within connectivity, interoperability, artificial intelligence and machine learning enabling new and improved services are expected to create growth in the marketplace. Due to the COVID-19 pandemic, revenues in 2020 are expected to be slightly lower compared to the previous year. In 2021, revenues are however expected to bounce back and exceed the 2019 figures.

The building automation market is served by a range of different actors, spanning from small start-ups to major corporations that operate globally in various industry sectors. The leading BMS providers include large companies such as ABB, Honeywell, Siemens, Johnson Controls and Schneider Electric. These players are also the leading actors in one or several of the building automation categories in this report. Leading providers of HVAC control products include Delta Controls, Distech Controls, KMC Controls and Danfoss. Major lighting and window control solution providers include Signify, Acuity Brands, Lutron and Somfy. The fire safety, security and access control market is led by Assa Abloy, Axis, Carrier and Tyco. The elevator and escalator management market is dominated by KONE, Otis, Schindler and ThyssenKrupp while the audio, video and entertainment segment is served by AMX/Harman, Crestron, Elan Home Systems and Extron. Water management is a smaller segment and includes market players such as Apana and Banyan Water.

This report answers the following questions:

- Which are the main verticals within smart buildings and building automation?
- What are the main drivers behind growth in this market?
- What are the challenges and roadblocks towards widespread adoption?
- What are the business models and channels-to-market for smart building solutions?
- Which are the leading building management system (BMS) vendors?
- How are product OEMs and BMS vendors positioning themselves?
- What connectivity technologies are smart building system vendors betting on?
- What is the potential market size for cellular IoT in building automation?
- How will the smart building market evolve in the next five years?

Executive Summary

1 Introduction to smart buildings

1.1 Introduction

- 1.1.1 Definitions and brief history of commercial building automation
- 1.1.2 From building automation to smart buildings
- 1.1.3 Smart buildings are an integral part of smart cities

1.2 Types of commercial building automation

- 1.2.1 HVAC and energy management systems
- 1.2.2 Lighting and window control systems
- 1.2.3 Fire safety, security and access control
- 1.2.4 Elevator and escalator management
- 1.2.5 Audio, video and entertainment
- 1.2.6 Water management
- 1.2.7 Other types of building automation
- 1.2.8 Building management systems

1.3 Building automation market segments

- 1.3.1 Government buildings
- 1.3.2 Healthcare buildings and hospitals
- 1.3.3 Hospitality buildings and hotels
- 1.3.4 Office buildings
- 1.3.5 Production buildings and factories
- 1.3.6 Retail outlets
- 1.3.7 Commercial building stock by region
- 1.3.8 New buildings versus existing buildings

1.4 Macro trends

- 1.4.1 Global population growth and urbanisation
- 1.4.2 Sustainability
- 1.4.3 Increasing energy demands

1.5 Market drivers

- 1.5.1 Energy consumption of commercial buildings
- 1.5.2 Optimising energy consumption in commercial buildings
- 1.5.3 The next frontier – zero energy buildings
- 1.5.4 Operational efficiency
- 1.5.5 Occupancy comfort and productivity
- 1.5.6 Space optimisation
- 1.5.7 Regulations and standards
- 1.5.8 Grants, loans, rebates and deductions

1.6 Technology drivers

- 1.6.1 Big data and data analytics
- 1.6.2 Cloud and edge computing
- 1.6.3 Deep learning and artificial intelligence
- 1.6.4 Wireless connectivity

1.7 Market barriers

- 1.7.1 Lack of clarity on return on investment
- 1.7.2 Competitive markets versus oligopolies
- 1.7.3 Proprietary solutions and lack of interoperability

- 1.7.4 Security and privacy concerns

1.8 Industry consortiums, certifications and standards

2 Networks and communications technologies

2.1 Overview

- 2.1.1 Integration in building automation
- 2.1.2 Approaches to establishing interoperability
- 2.1.3 Network protocols and topologies
- 2.1.4 Technology choices of product OEMs
- 2.1.5 Combine IT networks and building automation networks or keep them apart?

2.2 Building automation protocols

- 2.2.1 BACnet
- 2.2.2 DALI
- 2.2.3 KNX
- 2.2.4 LonWorks
- 2.2.5 M-Bus
- 2.2.6 Modbus
- 2.2.7 OpenTherm
- 2.2.8 SNMP

2.3 Networking technologies

- 2.3.1 Bluetooth
- 2.3.2 EnOcean
- 2.3.3 Li-Fi
- 2.3.4 LPWAN
- 2.3.5 Power over Ethernet
- 2.3.6 Thread
- 2.3.7 Wi-Fi
- 2.3.8 ZigBee
- 2.3.9 Z-Wave

2.4 Wireless versus wired communications

3 Technology providers and OEMs

3.1 Market overview

3.2 HVAC and energy management

- 3.2.1 75F
- 3.2.2 Autani
- 3.2.3 Automated Logic (Carrier)
- 3.2.4 BuildingIQ
- 3.2.5 Cimetrics
- 3.2.6 Danfos
- 3.2.7 Delta Controls (Delta Electronics)
- 3.2.8 Distech Controls (Acuity Brands)
- 3.2.9 Entouch Controls
- 3.2.10 KMC Controls
- 3.2.11 KGS Buildings
- 3.2.12 Lynxspring
- 3.2.13 Regin
- 3.2.14 Senseware
- 3.2.15 Telkonet
- 3.2.16 Verdigris Technologies

3.3 Lighting and window control

- 3.3.1 Acuity Brands
- 3.3.2 Cree Lighting (IDEAL Industries)
- 3.3.3 Digital Lumens (Osram)
- 3.3.4 Enlighted (Siemens)
- 3.3.5 Legrand
- 3.3.6 Leviton
- 3.3.7 Lutron Electronics
- 3.3.8 Silvair
- 3.3.9 Signify
- 3.3.10 Somfy
- 3.3.11 View

3.4 Fire safety, security and access control

- 3.4.1 AMAG Technology (G4S)
- 3.4.2 Assa Aloy
- 3.4.3 Axis Communications (Canon)
- 3.4.4 Carrier
- 3.4.5 Motorola Solutions
- 3.4.6 Nortek Security & Control
- 3.4.7 Tyco (Johnson Controls)
- 3.4.8 Zaplox

3.5 Elevator and escalator management

- 3.5.1 KONE
- 3.5.2 Otis
- 3.5.3 Schindler
- 3.5.4 ThyssenKrupp

3.6 Audio, video and entertainment

- 3.6.1 AMX/Harman (Samsung)
- 3.6.2 Crestron Electronics
- 3.6.3 Elan Home Systems (Nortek Security & Control)
- 3.6.4 Extron

3.7 Water management

- 3.7.1 Apana
- 3.7.2 Banyan Water
- 3.7.3 Hydropoint Data Systems

4 Building management system and application vendors

4.1 Market overview

- 4.1.1 Go-to-market strategies
- 4.1.2 Return-on-Investment

4.2 Building management system vendors

- 4.2.1 ABB
- 4.2.2 Bosch
- 4.2.3 Honeywell
- 4.2.4 Johnson Controls
- 4.2.5 Kieback&Peter
- 4.2.6 Sauter
- 4.2.7 Schneider Electric
- 4.2.8 Siemens

4.3 Building automation application providers

- 4.3.1 bGrid
- 4.3.2 Facilio
- 4.3.3 J2 Innovations (Siemens)
- 4.3.4 Metrikus
- 4.3.5 SkyFoundry
- 4.3.6 Switch Automation

5 Market forecasts and conclusions

5.1 Market trends and analysis

- 5.1.1 Market penetration of building automation
- 5.1.2 New value proposition for building occupants
- 5.1.3 The covid-19 pandemic creates opportunities for new building applications
- 5.1.4 BloT enables integration of different building functions
- 5.1.5 The impact of 5G on the building automation market
- 5.1.6 Regional differences continue to be important
- 5.1.7 Building automation systems increasingly being targeted for cyberattacks
- 5.1.8 When is the right time for building owners to engage?
- 5.1.9 Mergers and acquisitions

5.2 Europe

- 5.2.1 Shipments
- 5.2.2 Installed base

5.3 North America

- 5.3.1 Shipments
- 5.3.2 Installed base

5.4 Rest of World outlook

5.5 Cellular IoT device shipments and connections

Glossary

About the Author

Martin Bäckman Senior Analyst with a master's degree in Industrial Engineering and Management from Chalmers University of Technology. He joined Berg Insight in 2018 and his areas of expertise include building automation, smart homes and security applications.

Berg Insight offers premier business intelligence to the telecom industry. We produce concise reports providing key facts and strategic insights about pivotal developments in our focus areas. Berg Insight also offers detailed market forecast databases and advisory services. Our vision is to be the most valuable source of intelligence for our customers.

Order form — TO RECEIVE YOUR COPY OF THE COMMERCIAL BUILDING AUTOMATION MARKET

You can place your order in the following alternative ways:

1. Place your order online in our web shop at www.berginsight.com
2. Mail this order sheet to us at: Berg Insight AB, Viktoriagatan 3, 411 25 Gothenburg, Sweden
3. Email your order to: info@berginsight.com
4. Phone us at +46 31 711 30 91

Choose type of format

- Paper copy 1000 EUR
- PDF 1-5 user license 1500 EUR
- PDF corporate license 3000 EUR
