

# The Carsharing Telematics Market

**The Carsharing Telematics Market** is the fourth strategy report from Berg Insight analysing the latest developments on this market worldwide.

This strategic research report from Berg Insight provides you with 170 pages of unique business intelligence including 5-year industry forecasts and expert commentary on which to base your business decisions.

## **Highlights from this report:**

- **Insights** from 30 executive interviews with market leading companies.
- **New data** on carsharing fleets and members worldwide.
- **Comprehensive overview** of the carsharing telematics value chain.
- **In-depth analysis** of market trends and key developments.
- **Detailed profiles** of 32 carsharing platform vendors and their propositions.
- **Case studies** of 65 carsharing initiatives from specialist CSOs, car rental companies and car OEMs.
- **Market forecasts** by region lasting until 2025.

## The public carsharing fleet reached 463,000 vehicles worldwide in 2020

Passenger cars and light trucks are the main modes of transportation in most industrialised countries. The vast majority of car trips in metropolitan areas are drive-alone trips with only one person in the car and vehicles are used for only about one hour per day on average. Carsharing is one of many car-based mobility services that have become available for people that want to complement other modes of transportation with car-based mobility occasionally. Examples of other car-based mobility services include traditional car rental, carpooling, ridesharing, taxi and ridesourcing services. Many of these mobility services aim to decrease the cost of car-based transportation, create convenience through fewer ownership responsibilities, as well as reduce congestion and environmental impact.

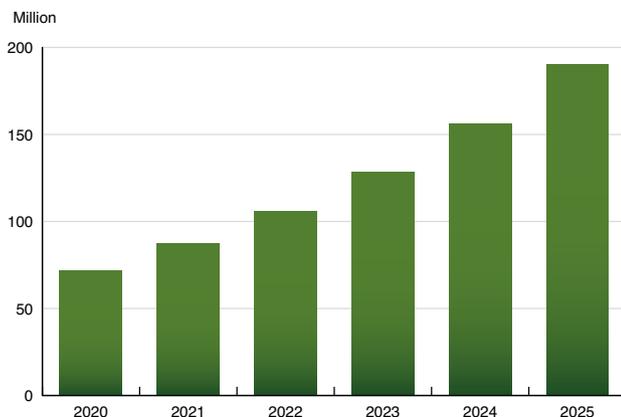

Carsharing is a decentralised car rental service focusing on short term rentals that supplements other modes of transports including walking, cycling and public transport. Carsharing aims to provide an alternative to individual car ownership without restricting individual mobility by providing affordable access to cars. CarSharing Organisations (CSOs) offer members access to a fleet of shared cars from unattended self-service locations. Today, most CSOs use station-based networks with roundtrip rental. This operational model requires members to return a vehicle to the same designated station from which it was accessed. Some CSOs have also started to offer one-way carsharing that enables users to return the car to any station operated by the CSO. Another model that is rapidly gaining in popularity is free floating carsharing, which enables members to pick up and drop off cars anywhere within a designated area. The ability to access available cars instantly without prior booking and no need to schedule return time make this type of service attractive for short trips.

Telematics systems and smartphones are key enablers of carsharing services. In-car hardware technologies for carsharing services comprise an on-board computer, telematics device and RFID reader for capturing trip data, enable fleet management and grant access to the car through an RFID smartcard or smartphone app. An in-vehicle user terminal with keypad and display may also be installed to provide the driver with visible messages and guidance, as well as allow management of reservations from within the vehicle. Software platforms include complete IT systems that can support all the operational activities of a CSO ranging from management of in-vehicle equipment, fleet management, booking management, billing, ►

► as well as operations supervision via dashboards and data analytics. Leading vendors of hardware and software platforms include INVERS, Convadis, Continental, Octo Telematics, Vullog, Ridecell, Mobility Tech Green, Targa Telematics and OpenFleet. Several carsharing technology vendors also target the emerging corporate carsharing market that aims to increase corporate car pool availability and reduce mobility costs.

Commercial carsharing services are offered by specialist carsharing companies, car rental companies, carmakers, as well as public transport operators. Examples of leading CSOs backed by carmakers include SHARE NOW (owned by Daimler and BMW), Free2Move (owned by PSA Group/Stellantis), WeShare (owned by Volkswagen) and KINTO Share (owned by Toyota). Car rental CSOs include Ubeeqo (owned by Europcar Mobility Group), Sixt Share (owned by Sixt) as well as Zipcar (owned by Avis Budget Group). Examples of specialised CSOs include Times Car Plus (owned by the Japanese parking lot operator Park 24), Socar in South Korea, EvCard and Mofan in China, Enjoy (owned by the Italian energy company Eni), Mobility Carsharing in Switzerland, Stadtmobil and Cambio in Germany, Communauto in Canada and GoGet in Australia.

The carsharing market is currently in a phase of growth which is expected to continue in the coming years. The market has managed to grow despite the impact of the COVID-19 pandemic. Berg Insight estimates that the total number of carsharing members worldwide reached 71.9 million at the end of 2020. At the same time, the total car fleet operated by CSOs had reached about 463,000 vehicles. Berg Insight forecasts that carsharing membership will grow to about 190.3 million globally by the end of 2025 and the total carsharing fleet will then reach approximately 971,000 cars. The corporate carsharing telematics market is moreover estimated to 68,000 vehicles at year-end 2020 and is forecasted to reach about 135,000 vehicles in 2025. Europe, North America and Asia-Pacific so far represent the vast majority of all carsharing programmes and active members from an international perspective. The front-running markets include Russia, Germany, Italy, the US, South Korea, China and Japan.

Carsharing members (World 2020–2025)

### This report answers the following questions:

- What is the current status of the carsharing telematics industry?
- Which are the leading carsharing telematics platform providers?
- How are carmakers positioning themselves on the carsharing market?
- What carsharing services are available from leading service providers today?
- What business models are used by carsharing companies?
- What technology choices are there for carsharing operators?
- How will the market evolve in Europe, North America and other parts of the world?
- How are players in the carsharing telematics value chain handling the COVID-19 pandemic?
- How will the corporate carsharing market evolve in the upcoming years?

### Executive Summary

#### 1 Cars and personal mobility services

##### 1.1 Introduction

- 1.1.1 Passenger cars in use by region
- 1.1.2 New passenger car registration trends

##### 1.2 Market trends

- 1.2.1 Peak car use and car ownership
- 1.2.2 The sharing economy

##### 1.3 Car-based mobility services

- 1.3.1 Overview of carsharing services
- 1.3.2 Carsharing operational models

##### 1.4 Carsharing services worldwide

- 1.4.1 Carsharing in Europe
- 1.4.2 Carsharing in North America
- 1.4.3 Carsharing in Asia-Pacific
- 1.4.4 Carsharing in ROW
- 1.4.5 Overview of carsharing service providers

##### 1.5 Car telematics infrastructure

- 1.5.1 Vehicle segment
- 1.5.2 Tracking segment
- 1.5.3 Network segment
- 1.5.4 Service segment

#### 2 Car OEM mobility service initiatives

##### 2.1 The BMW and Daimler joint venture YOUR NOW (SHARE NOW)

- 2.1.1 SHARE NOW

##### 2.2 New mobility projects and services from Ford

##### 2.3 GM urban mobility programmes

##### 2.4 Hyundai Motor Group carsharing and mobility programmes

##### 2.5 Nissan carsharing services

##### 2.6 PSA Group's mobility services (Stellantis)

- 2.6.1 Free2Move

##### 2.7 Renault Group's carsharing initiatives

##### 2.8 Toyota mobility services platform and KINTO services

- 2.8.1 KINTO

##### 2.9 New mobility concepts from the Volkswagen Group

- 2.9.1 Urban Mobility International (WeShare)
- 2.9.2 Audi mobility service programmes

##### 2.10 Volvo Car Mobility

#### 3 Carsharing organisations

##### 3.1 Specialist carsharing companies in Europe

- 3.1.1 Bluecarsharing (Bolloré Group)
- 3.1.2 Cambio
- 3.1.3 Citiz
- 3.1.4 CityBee
- 3.1.5 Co-Wheels
- 3.1.6 Enjoy
- 3.1.7 Flinkster
- 3.1.8 GoCar
- 3.1.9 GreenMobility
- 3.1.10 Greenwheels
- 3.1.11 LetsGo Delebil and LetsGo Fleet Systems

- 3.1.12 Miles
- 3.1.13 Mobility Carsharing Switzerland
- 3.1.14 MOL Limo
- 3.1.15 Move About Group
- 3.1.16 Panek
- 3.1.17 Poppy
- 3.1.18 Share'Ngo
- 3.1.19 Stadtmobil
- 3.1.20 Zity

##### 3.2 Specialist carsharing companies in the Americas

- 3.2.1 Awto
- 3.2.2 BlueLA (Blink Charging)
- 3.2.3 Carrot
- 3.2.4 Communauto
- 3.2.5 Envoy Technologies
- 3.2.6 GIG CarShare
- 3.2.7 Modo
- 3.2.8 Turbi

##### 3.3 Specialist carsharing companies in Asia-Pacific

- 3.3.1 BlueSG
- 3.3.2 EvCard
- 3.3.3 GoFun
- 3.3.4 GoGet
- 3.3.5 GreenShareCar
- 3.3.6 Mofan Travel (BAIC Mobility)
- 3.3.7 Pand Auto
- 3.3.8 Socar
- 3.3.9 Zoomcar

##### 3.4 Specialist carsharing companies in ROW

- 3.4.1 Anytime
- 3.4.2 Carmine
- 3.4.3 Delimobil
- 3.4.4 Ekar
- 3.4.5 Electrip
- 3.4.6 GoTo Global Mobility
- 3.4.7 Yandex Drive

##### 3.5 Car rental and leasing companies

- 3.5.1 Avis Budget Group and Zipcar
- 3.5.2 Enterprise Rent-A-Car and Enterprise CarShare
- 3.5.3 Europcar Mobility Group and Ubeeqo
- 3.5.4 Hertz
- 3.5.5 Lotte Rental and Green Car
- 3.5.6 ORIX Auto Corporation and ORIX CarShare
- 3.5.7 Sixt Group
- 3.5.8 U-Haul
- 3.5.9 Alphabet
- 3.5.10 ALD Automotive
- 3.5.11 Leasys

#### 4 Technology vendors

##### 4.1 End-to-end carsharing solutions

- 4.1.1 BMW Mobility Services
- 4.1.2 FastFleet and Local Motion by Zipcar
- 4.1.3 Geotab
- 4.1.4 IER-Polyconseil (Bolloré Group)
- 4.1.5 IMS (part of Trak Global Group)
- 4.1.6 INVERS
- 4.1.7 Mobiag

- 4.1.8 Mobility Tech Green
- 4.1.9 MoboKey
- 4.1.10 Octo Telematics
- 4.1.11 OpenFleet
- 4.1.12 Targa Telematics
- 4.1.13 Vulog
- 4.1.14 Webfleet solutions
- 4.1.15 WeGo Carsharing

##### 4.2 Carsharing software platforms

- 4.2.1 Cantamen
- 4.2.2 Eccocar
- 4.2.3 Fleetster (Next Generation Mobility)
- 4.2.4 Glide.io
- 4.2.5 Good Travel Software
- 4.2.6 M-TRIBES
- 4.2.7 Moove Connected Mobility
- 4.2.8 Navigator Group of Companies
- 4.2.9 Ridecell
- 4.2.10 Wunder Mobility
- 4.2.11 Zemtu

##### 4.3 In-vehicle systems

- 4.3.1 Astus (ETL Electronics)
- 4.3.2 Bright Box
- 4.3.3 Convadis
- 4.3.4 Continental
- 4.3.5 Mobility On Cloud
- 4.3.6 Ruptela

#### 5 Market forecasts and trends

##### 5.1 Carsharing market forecasts

- 5.1.1 Carsharing in the EU28+EFTA
- 5.1.2 Carsharing in North America
- 5.1.3 Carsharing in Asia-Pacific
- 5.1.4 Carsharing in ROW
- 5.1.5 Connected carsharing platform forecast
- 5.1.6 Corporate carsharing forecast

##### 5.2 Mergers and acquisitions in the carsharing telematics space

##### 5.3 Market trends

- 5.3.1 Carsharing is becoming increasingly integrated with other mobility services
- 5.3.2 Carsharing and public transport ecosystems to converge
- 5.3.3 Electric cars are a natural fit for carsharing
- 5.3.4 Carsharing operators build wider ecosystems of partners
- 5.3.5 Free floating carsharing services on the rise
- 5.3.6 Hybrid station-based and free floating models show promise
- 5.3.7 Autonomous cars are expected to change the playing field for carsharing
- 5.3.8 Carsharing becomes a popular means to reduce corporate mobility costs
- 5.3.9 Carsharing operators introduce new pricing models
- 5.3.10 Last mile carsharing add-on services to emerge in Europe
- 5.3.11 The COVID-19 impact on the carsharing telematics market

#### Glossary

## About the Author

**Martin Svegander** is a Senior Analyst with a Master's degree in Industrial Engineering and Management from Linköping University. He joined Berg Insight in 2017 and his areas of expertise include vehicle telematics, insurance telematics and shared mobility services.

**Berg Insight** offers premier business intelligence to the telecom industry. We produce concise reports providing key facts and strategic insights about pivotal developments in our focus areas. Berg Insight also offers detailed market forecast databases and advisory services. Our vision is to be the most valuable source of intelligence for our customers.

### Who should buy this report?

**The Carsharing Telematics Market** is the foremost source of information about the rapid adoption of carsharing technology. Whether you are a car manufacturer, telematics service provider, telecom operator, content provider, investor, consultant, or government agency, you will gain valuable insights from our in-depth research.
