

# Connected Vending Machines

**Connected Vending Machines** is the fourth consecutive report from Berg Insight analysing the latest developments on the vending telemetry and cashless payment market worldwide.

This strategic research report from Berg Insight provides you with 100 pages of unique business intelligence including 5-year industry forecasts and expert commentary on which to base your business decisions.

## **Highlights from the fourth edition of the report:**

- ◆ **Detailed** analysis of the vending industry.
- ◆ **Summary** of the latest industry trends and developments.
- ◆ **Updated** in-depth profiles of key players in the vending telemetry and cashless payment markets.
- ◆ **Reviews** of vendor market shares and competitive dynamics.
- ◆ **Perspectives** on the impact of mobile wallet services.
- ◆ **Extensive** global and regional market forecasts lasting until 2024.

## **A total of 8.9 million vending machines will be online by 2024**

The first solutions for including connectivity in vending machines became commercially available more than two decades ago. It has however taken years for the technology to gain the interest of mainstream vending operators. Berg Insight estimates that around 28 percent of the world's 15 million vending machines are connected. The market has gained momentum in recent years, where the demand for cashless payments has so far been a main driver. Vending telemetry is however anticipated to have a more transformational effect on the industry as these solutions enable operators to improve their operational efficiency.

The global installed base of connected vending machines reached an estimated 4.2 million units in 2019. North America is estimated to represent the largest share of around 2.0 million of these machines, whereas the corresponding number for Europe as well as the Rest of the World is 1.1 million each. Outside North America and Europe, connected vending machines can mainly be found in Japan, China and Australia. Berg Insight forecasts that the number of connected vending machines worldwide will grow at a compound annual growth rate (CAGR) of 16.3 percent to reach 8.9 million units by 2024. As a result, the global penetration rate will reach 52.0 percent at the end of the forecast period.

The global market for connected vending solutions is served by a variety of players. Many of the leading providers are specialised technology companies. USA Technologies is the largest provider in terms of installed base, having more than 1.0 million connected vending machines. Other major suppliers include Ingenico Group, Nayax and Televend (INTIS). Ingenico and Nayax are two international players while Televend monitors vending machines mostly in Europe. Other suppliers with notable installed bases include Vendon, Vianet Group, MatiPay (Sitael) and InHand Networks. Numerous vending machine manufacturers are also active in the connected vending space. The manufacturer Crane holds one of the leading positions from a global perspective through Crane Connectivity Solutions and TCN Group is an important player in China. Vending operators active in the field of connected vending machines most often work with third-party providers, while some even have various in-house solutions. Examples of such vending operators include Chinese UBox and Italian IVS Group.

### **Berg Insight's M2M Research Series**

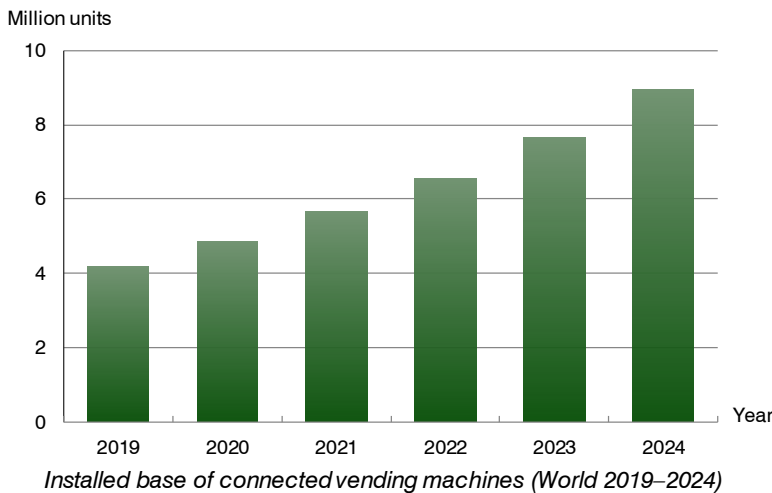

What are the key business opportunities in the emerging wireless M2M/IoT market? Berg Insight's M2M Research Series is a unique series of 40 market reports published on a regular basis. Each title offers detailed analysis of a specific vertical application area such as smart homes, smart metering, fleet management and car telematics, or covers horizontal topics including IoT platforms, software, hardware, IoT connectivity statistics and the mobile operators' IoT strategies.

**BERG  
INSIGHT**

## This research report answers the following questions:

- ◆ How many of the world's vending machines are online today?
- ◆ What is the potential market size for vending telemetry solutions?
- ◆ Which trends and developments are shaping the market?
- ◆ Which are the leading vending telemetry and cashless payment system vendors?
- ◆ When will cashless payments be commonplace in the vending industry?
- ◆ How will emerging mobile wallet services affect the market?

**Berg Insight** offers premier business intelligence to the telecom industry. We produce concise reports providing key facts and strategic insights about pivotal developments in our focus areas. Berg Insight also offers detailed market forecast databases and advisory services. Our vision is to be the most valuable source of intelligence for our customers.
